SUMMARY

Experienced MEAN and MERN Stack Developer with over 5+ years of experience spearheading complex web applications and ERP systems. Implemented cutting-edge solutions in Multiple product, and UI/UX optimization, while engineering robust integrations with third-party APIs. Developed data-driven strategies to enhance system performance and security, showcasing strong problem-solving skills across diverse projects in fintech, recruitment, and e-commerce sectors.

TOOLS AND TECHNOLOGIES

- **Programming Languages:** JavaScript, HTML5, CSS
- **Frameworks and Libraries:** Angular, React.js, Next.js, Node.js, Express.js, Nest.js, GSAP (GreenSock Animation Platform), Ng Zorro, Elastic UI
- **Databases:** MongoDB,
- **Development Stacks:** MEAN (MongoDB, Express.js, Angular, Node.js), MERN (MongoDB, Express.js, React.js, Node.js)
- **Web Technologies:** RESTful APIs, Responsive Web Design
- **Development Tools:** ESLint, VS Code
- **Software Development Practices:** Test-Driven Development (TDD), Code Reviews
- **Data Technologies:** Big Data, Data Analysis
- **AI Based Development Technologies:** Claude, codex, Cursor

WORK EXPERIENCE

Shispare | Team Lead Full Stack Developer Karachi, Sindh, Pakistan

November 2025 - Present

- Lead end-to-end architectural revamp of HRSG's flagship SaaS HRMS, leading a cross-functional team of 6 developers to replace a fragmented legacy system with a robust, scalable solution.
- Implemented high-performance system optimizations that eliminated extensive technical debt and patches, resulting in a 80% increase in application performance and system reliability.
- Accelerated development cycles by embedding Claude AI into team workflows, boosting prototyping speed by ~40% and improving overall coding efficiency by ~30%, saving an estimated 10+ hours per week.
- Directed a team of 5 developers in the design and deployment of One Smart Compliance, an AI-enabled, multilevel tenancy platform for expert-supervised organizational policy writing.
- Facilitated technical mentorship and code reviews for a combined team of 11 engineers across two major projects, ensuring high standards of code quality and architectural integrity.

Appxone | Mean Stack Developer Karachi, Sindh, Pakistan

November 2023 - August 2025

- Enhanced onboarding system features and functionality, driving a 30% improvement in user experience and process efficiency.

- Recovered critical lost documents for digital accounts, demonstrating strong problem-solving skills and reducing potential data loss by 95%
- Built and maintained 5+ third-party API integrations including Slack, eliminating an estimated 10+ hours/week of manual work per client team and improving cross-platform operational efficiency.
- Generated insightful reports for management decision-making, leading to a 25% reduction in onboarding time and increase in resource allocation efficiency
- Partnered with team leads and German technical experts to integrate the onboarding system with NewBrain, reducing data sync errors by 50% and supporting 70% client organizations.

Skyscrapers | Frontend Developer Islamabad, Pakistan

April 2023 - November 2023

- Migrated and optimized Angular applications, achieving ~40% performance improvement and enhanced user experience across multiple client-facing platforms.
- Executed DDoS simulation testing and vulnerability mitigation across 4 platforms, identifying and resolving 15 critical vulnerabilities and reducing potential attack surface by ~45%.
- Managed a cross-functional engineering team delivering Pakistan Sweet Home and GharBar.com on schedule, reducing post-launch defects by ~30% through structured sprint planning.
- Optimized website performance and scalability, resulting in a 98% Page speed insight score for every page of website, achieved by making each and every component customize instead of using any CDN library for sliders etc.
- a structured code review process across the engineering team, reducing production defects by ~30% and cutting post-release hotfixes within the first quarter of rollout.

Empower Associates | Frontend Developer United States (Remote)

June 2022 - February 2023

- Developed recruitment automation features within Empower CRM, saving HR teams an estimated 8+ hours/week in manual data entry and accelerating hiring workflows across client organizations.
- Integrated frontend stack migration to Elastic UI, Redux, and React across a team of 5+ engineers, cutting component development time by ~30%, reducing UI inconsistencies by ~40%, and improving overall page load performance by ~20%
- Drove implementation of advanced HTTP security headers across the platform in collaboration with a 5+ person team, neutralizing 7+ vulnerability classes including XSS, clickjacking, and MIME sniffing.
- Overhauled code quality assurance processes alongside a 5+ person engineering team by integrating ESLint and TDD practices, reducing production bugs by ~35% and cutting average bug resolution time by ~40% within the first quarter.
- Independently designed and implemented 10+ CRM enhancements targeting external client workflows, improving platform usability scores by ~35% and driving a ~25% increase in daily active usage post-release.
- Optimized platform stability through targeted bug fixes, cutting page load times by 50% and reducing downtime by ~40%, enhancing experience for end users.

Stratesfy, Inc. | Frontend Developer Karachi, Sindh, Pakistan

May 2020 - April 2023

- Redesigned UI of ERP platform OCTOPUS independently, enhancing usability across core modules and boosting internal user satisfaction by ~35% post-implementation.
- Delivered and deployed third-party API integrations including Slack, reducing client manual workload by 50% and significantly improving operational efficiency across platforms.
- Orchestrated the migration of the project "STEP" from Angular 8 to Angular 10, incorporating Ng Zorro for design improvements, which resulted in a 25% increase in performance and a more modern user interface
- Established robust web security measures by implementing security headers and best practices, reducing vulnerabilities by 70% and ensuring GDPR compliance.
- Engineered scalable web applications in Angular and React JS, achieving ~35% faster load times and driving ~30% improvement in user engagement through optimized component architecture.

- Authored custom CMS themes and implemented GSAP animations, elevating the visual appeal and interactivity of web applications, leading to increase in positive user feedback
- Facilitated client meetings to gather requirements and feedback, translating business needs into technical solutions, which improved client satisfaction.

EDUCATION

Bachelor of Science - BS in Computer Science | Federal Urdu University of Arts, Science & Technology, Karachi. **2018-09- - 2023-02-**

Intermediate – Pre Engineering | Higher Secondary Board of Karachi **2017**

Matriculation – Computer Science | New Habib Public School – Board of Secondary Education Karachi **2015**

ACHIVEMENTS

- Spearheaded the UI revamp of the ERP system "OCTOPUS", rebuilding key modules and improving user experience, through the adoption of Module independent approach.
- Managed the migration of the STEP project from Angular 8 to Angular 10, incorporating Ng Zorro for design improvements, resulting in a 25% increase in performance and a more modern user interface.
- Recovered critical lost documents for digital accounts, demonstrating strong problem-solving skills and reducing potential data loss by 95%.
- Integrated GSAP animations and custom CMS themes, elevating visual appeal and interactivity of web applications, leading to increase in positive user feedback.
- Introduced ESLint and TDD practices across a team of engineers, cutting production bugs by ~35% and improving code reliability scores by ~40% across multiple active projects.
